Introduction

Calculations of Chronic Absenteeism

Chronic absenteeism includes any student absent 10% or more of the time that he/she was enrolled in any school. Mississippi defines attendance based on 63% of the student's instructional day. Students must attend at least 63% of their instructional day to be counted as present. Starting with the 2026-2027 school year, the Mississippi Department of Education (MDE) will calculate chronic absenteeism rates based on the federal definition of an absence, which is defined as 50% or more of the school day.

During 2025-2026, 115,385 Mississippi public school students were chronically absent compared to 120,408 students in 2024-2025. Mississippi's chronic absenteeism rate for 2025-26 is 26.5%, which is a 1.1% decrease from the previous year. The Mississippi Department of Education started reporting the rates in 2016. MDE first launched the attendance campaign in September 2018 to challenge students and school districts to strive to reduce individual absences to no more than five absences over the course of the entire school year. A statewide attendance awareness campaign was relaunched in June 2023 to encourage regular school attendance. Mississippi's campaign continues to be part of a national movement to reduce chronic absenteeism.

MDE began working with the National Dropout Prevention Center (NDPC) in January 2024 to help districts and schools address chronic absenteeism. As part of this effort, the MDE Office of Compulsory School Attendance Enforcement and Dropout Prevention (OCSAE & DOP) conducted twelve regional, two-day training sessions for individuals who support district attendance teams. Participants in the training sessions were introduced to the NDPC Strategic Process and provided a framework for using local attendance information to identify problems and develop practical solutions. Participants reviewed attendance data, examined reasons students were missing school, and discussed the impact the COVID-19 pandemic had on school attendance. The sessions also covered current research and practices that schools and districts can use to improve attendance and increase student engagement.

The training was part of MDE's larger effort to build the capacity of schools and districts across the state to respond to chronic absenteeism. It provided an opportunity for participants to share experiences, discuss practices that have worked in their schools, and learn from one another. The training also emphasized the connection between student engagement, classroom experiences, and regular school attendance.

MDE continued its partnership with NDPC in September 2025 with a two-day conference focused on strategies and resources for identifying and supporting students who are having difficulty in traditional school settings. The conference provided additional opportunities for educators and

other school personnel to learn about ways to better support students and address issues that may lead to disengagement from school.

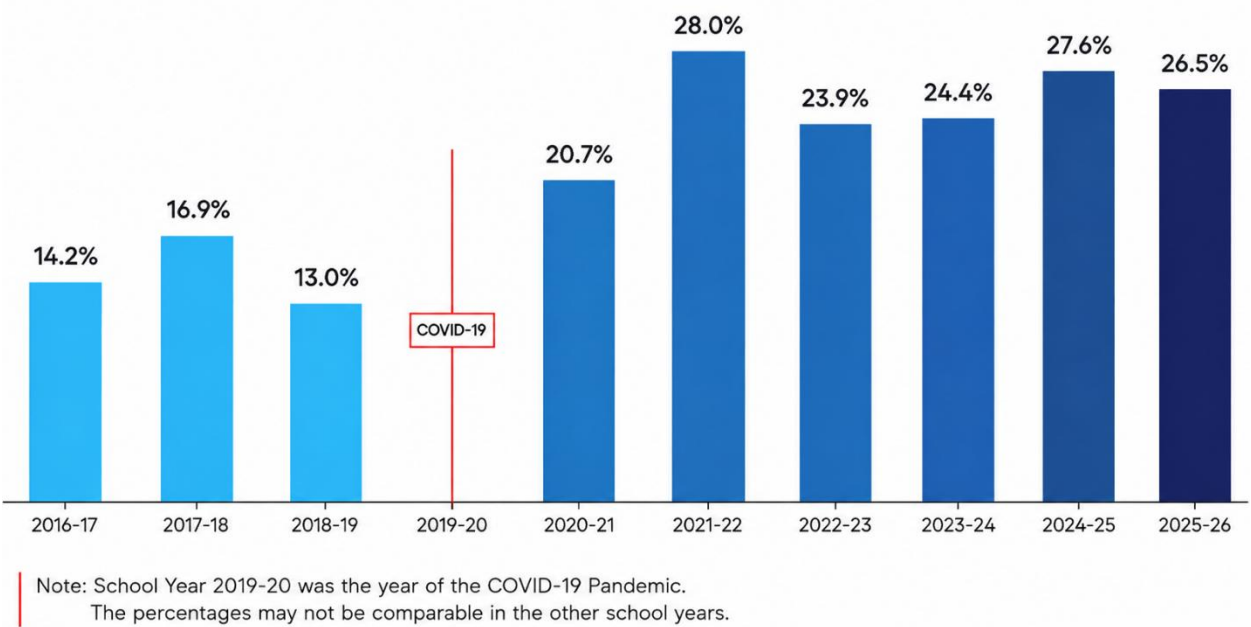

MDE will continue providing training and support to districts while working with community partners to address chronic absenteeism. These efforts will focus on helping schools identify attendance concerns early, understand the reasons students are missing school, and use appropriate strategies to help students stay connected to school.

The Mississippi Department of Education strongly urges all districts and schools to take immediate, proactive steps to combat chronic absenteeism. Here are specific actions that should be implemented without delay to ensure consistent student attendance and support academic success:

- Reduce student tardiness to reduce chronic absenteeism
- Use positive reinforcement to improve student attendance
- Promotion of school attendance at school sporting events
- Connect attendance to the school "brand" (mascots, slogans, cheers).
- Create a mentor program.
- Consider alternatives to suspension.
- Engage students and parents
- Recognize good and improved attendance
- Develop programmatic response to attendance barriers
- Provide personalized early outreach
- Monitor attendance data
- Review [statewide policies for virtual learning](#) to be sure district policies align with state requirements.
- Work with your school and district data clerks to ensure accurate attendance data is entered.
- Encourage teachers and staff to make personal contact with families when students are absent. We know the power of personal relationships and how they foster a sense of belonging.
- Work with School Attendance Officers to identify and engage students who are at risk of becoming chronically absent.
- Review your health and safety protocols for minimizing the spread of infectious illnesses.
- Take advantage of resources to promote regular student attendance:

The State's Chronic Absenteeism Rate

The figure below represents the state's chronic absenteeism rates for the school years 2016-17 to 2025-26. The current rate of 26.5% shows a 1.1% decrease from the previous year.

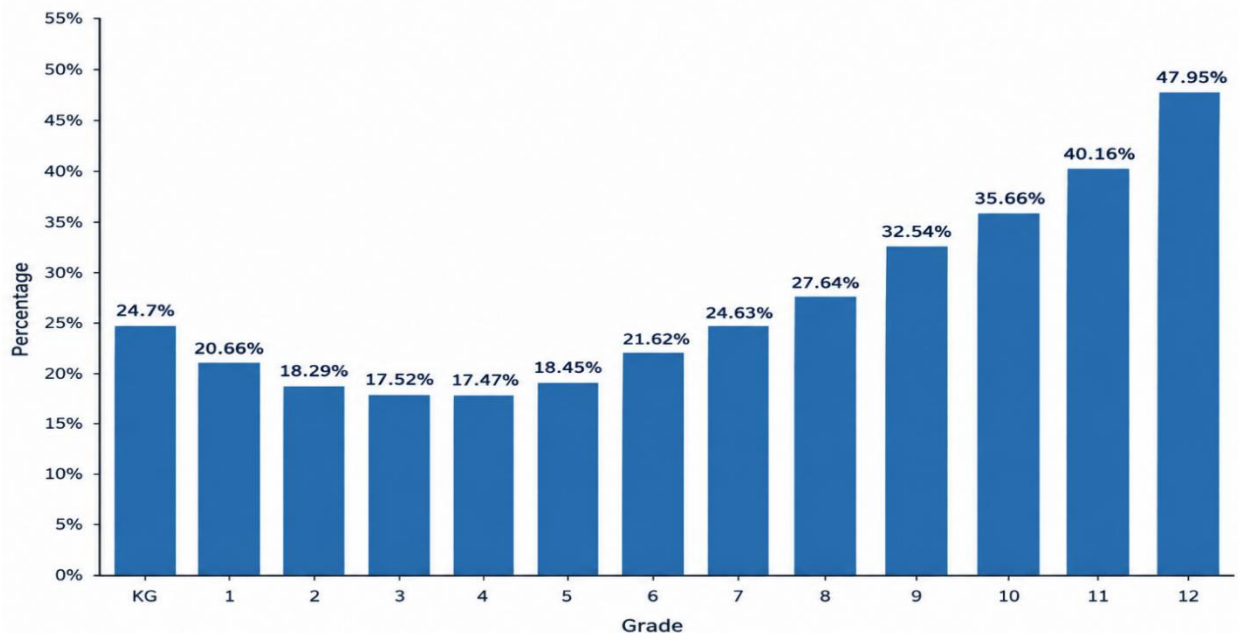

Bar chart showing chronic absenteeism rates by school year. Rates were 14.2% in 2016–17, 16.9% in 2017–18, and 13.0% in 2018–19. The 2019–20 school year is marked as the COVID-19 pandemic year, and its percentage is not shown as comparable. Rates were 20.7% in 2020–21, 28.0% in 2021–22, 23.9% in 2022–23, 24.4% in 2023–24, 27.6% in 2024–25, and 26.5% in 2025–26. A note states that 2019–20 was the year of the COVID-19 pandemic and percentages may not be comparable across the other school years.

Absences by Type (2025-2026)

Donut chart showing absences by type for the 2025–2026 school year. Of all absences, **64% were unexcused** and **36% were excused**.

Chronic Absenteeism by Grade (2025-2026)

Bar chart showing percentage by grade from kindergarten through Grade 12. The percentages are: Kindergarten 24.7%, Grade 1 20.66%, Grade 2 18.29%, Grade 3 17.52%, Grade 4 17.47%, Grade 5 18.45%, Grade 6 21.62%, Grade 7 24.63%, Grade 8 27.64%, Grade 9 32.54%, Grade 10 35.66%, Grade 11 40.16%, and Grade 12 47.95%. The percentage generally increases beginning in Grade 6, with Grade 12 having the highest percentage.

Chronic Absenteeism: 2025-26 Data Summary and Opportunities for Action

This report reflects a decrease in the statewide chronic absenteeism rate from 2024–2025. The detailed data and charts, however, show that attendance continues to vary significantly by grade level. Elementary grades generally have lower rates of chronic absenteeism, particularly Grades 2–5, while absenteeism increases steadily as students move into middle and high school. These differences point to the need for continued early attendance efforts, along with more targeted support for students in the secondary grades.

Early attendance patterns remain encouraging. Chronic absenteeism is lowest in Grades 2–5, ranging from 17.5% in Grade 3 to 18.5% in Grade 5. Grade 1 also has a relatively low rate of 20.7%, while Kindergarten is higher at 24.7%. Maintaining consistent communication with families, addressing attendance concerns early, and helping families understand the importance of regular attendance can help establish positive attendance patterns before challenges become more difficult to address.

The greatest concern is seen in the secondary grades. Chronic absenteeism increases from 21.6% in Grade 6 to 27.6% in Grade 8, followed by 32.5% in Grade 9 and 35.7% in Grade 10. The rate reaches 40.2% in Grade 11 and 48.0% in Grade 12. These numbers emphasize the need for districts to closely monitor attendance as students enter and progress through middle and high school. Early identification of students with attendance concerns, individualized attendance plans, family outreach, and connections to school and community resources can provide additional support for students facing barriers to regular attendance.

The grade-level data also provides districts with useful information for planning and evaluating attendance efforts. Rather than applying the same approach across all grade levels, districts can use these patterns to determine where additional attention and resources are needed. Continued focus on prevention in the early grades, combined with more intensive and individualized supports in the secondary grades, can help reduce missed instructional time and improve overall student attendance.

MDE has strengthened its efforts to reduce chronic absenteeism through a more proactive and coordinated approach to improving student attendance. Current strategies emphasize early identification of attendance concerns, meaningful family engagement, targeted interventions, and the use of attendance data to inform school and district improvement efforts.

A key component of this approach is the early identification of students who are beginning to demonstrate patterns of absenteeism. Schools are encouraged to monitor attendance consistently and examine trends across grade levels and student subgroups. This allows school leaders and staff to identify emerging concerns, determine where additional support may be needed, and respond before absenteeism becomes chronic.

Schools are also implementing tiered attendance interventions based on the frequency and severity of a student's absences. Initial interventions may include attendance monitoring, parent communication, and school-based support. For students with more persistent attendance concerns, schools may provide more individualized interventions and coordinate additional resources. This graduated approach allows schools to respond to individual student needs rather than relying on a single intervention for all students.

An additional strategy is the development of chronic absenteeism reduction plans when attendance data indicate a significant concern. These plans provide schools with a structured process for identifying the specific attendance challenges affecting a grade level or student subgroup and outlining steps to address them. Plans are intended to identify evidence-based strategies, establish a timeline for implementation, include opportunities for family and community engagement, and establish measures for monitoring progress. This creates a more intentional approach to attendance improvement by requiring schools to move from identifying a problem to establishing a plan for addressing it and evaluating whether the strategies are producing results. The use of attendance data is central to this planning process. Examining chronic absenteeism by grade level and student subgroup can help schools identify trends, areas of need, and disparities in attendance. These data can then be used to establish measurable goals, select appropriate interventions, and monitor progress throughout the school year. Regular review of the data also allows schools to adjust their strategies when interventions are not producing the desired outcome.

Collaboration among schools, families, attendance personnel, and community partners further supports these efforts. Chronic absenteeism can result from a variety of academic, family, transportation, health, social, or other barriers. Addressing these barriers often requires coordination across multiple individuals and organizations rather than relying solely on school-based attendance enforcement.

Collectively, these strategies reflect a shift toward prevention, early intervention, and continuous improvement in addressing chronic absenteeism. The emphasis is increasingly placed on understanding patterns of absenteeism, identifying barriers to regular attendance, and engaging families.

Lowest Chronic Absenteeism Rates

By District

District Name	Chronic Abs Rate
East Jasper School District	11.2%
Rankin County School District	12.3%
Okolona School District	12.6%
Leland School District	14.0%
